## Education

**Jain University**

Bengaluru, India

### Courses:

## Experience

### MERN Stack Developer Intern

- **Built end-to-end UI of an application** : Used React JS, HTML, CSS-3, Bootstrap-5, JavaScript, jQuery, Strapi, Drupal, CMS in development and designing of the whole project.
- **Project: KundaliDikhao - Astrotalk Clone** : Appointment booking with Astrologer, Direct Messaging to Astrologer, Video call service, other functionalities like Horoscope, Kundali Matching, Panchang etc.  
**Tech:** HTML, CSS-3, Bootstrap-5, JavaScript
- **CardXPro Cards Trading Platform**: Got insights about intricacy of the software development by working and collaborating upon front-end part of various applications with the senior developers of the company.

### Web Designer

- **Built static Websites using HTML, CSS and JavaScript:**
- **LostArt** - [Dynamic Wallpaper Rotation](#)

## Projects

**3D Portfolio with Chat-bot** : Crafted a captivating 3D portfolio using GSAP and Locomotive JS . Packed with project insights, experience highlights, and contact details, alongside a versatile chatbot. Users enjoy seamless transitions between light and dark modes and can effortlessly download my CV.

**Tech** : GSAP , Locomotive JS , JavaScript , HTML, CSS

**Foodie Network Website**: Developed a full-featured recipe sharing platform enabling users to explore, like, and comment on various recipes. Implemented secure user authentication and authorization with login and signup functionalities and am currently working on enabling users to upload their own recipes.

**Tech**: Mongo DB , Express.js , React, Node.js

**Mitra-Log - Frontend Facebook Clone**: Full-fledged front-end clone of Facebook with scrolling posts of friends, seeing messages notifications and requests and I am looking forward to enable chat option with friends.

**Tech**: React JS , HTML, CSS-3, JavaScript, Bootstrap-5, Material UI (Feb '23)

[Link to project C?](#)

**Java Desktop Application** : Designed and developed a Java Desktop Application for comprehensive factory management, encompassing employee CRUD operations, inventory tracking, deal management, expense tracking, and automated profit/loss calculation

**Tech**: Java, Swing UI, MySQL
